Yoltrund: The World of Eternal Woe

Lost in a world of fire, stone, and death, one young man must find his way out and the only way out is deeper into the Hell of flame and death.

Through his journey, he must purify the corruption within him so he does not suffer the fate of the sinners he meets in Yoltrund. This world burns with anger and fury, shrouded in shadow, with a heart colder than ice. He must reach the centre in order to be set free from this torment.

With The Master as his guide, will he return to the Light or succumb to the Shadow?

The Story

The story is divided into 10 chapters known as "Cantos", each Canto describing a different area of Yoltrund. The story is presented in its original form and writing as it was when it was first written 3 years ago in 2015.
